TECHNICAL SKILLS

Languages

Java JavaScript Python SQL

C

Frameworks & Libraries

React.js Vue.js Express.js

Fastify Spring Boot GSAP

Databases

PostgreSQL MongoDB MySQL

Upstash Redis

Tools & Platforms

Git GitHub

Postman Apps Script Netlify

Vercel

Concepts & APIs

OAuth 2.0 Razorpay REST APIs

EDUCATION

Bachelor of Engineering (CSE)

Sona College of Technology

2023 – 2027 | CGPA: 7.45 (Current: 4th Year)

Higher Secondary School

Jedarpalyam Govt. Hr. Sec. School

Passed with 89% (Maths & CS)

CERTIFICATIONS

✔ NPTEL — Design Thinking

✔ NPTEL — Cloud Computing

✔ NPTEL — Machine Learning

✔ NPTEL — Human Computer Interaction

CAREER OBJECTIVE

To start my professional career as an Aspiring Software Developer, where I can apply my full-stack programming, automation, and problem-solving abilities to build reliable, high-performance applications while growing within a global technology organization.

Frontend Developer Intern

[Spirilia](#)

(Pre-Incubation, IIT Madras)

Sep 2022-Dec 2025

•

- Integrated asynchronous REST APIs using Axios and handled live client data streams.
- Collaborated closely in cross-functional sprints to ship responsive modules to staging.

Full-Stack Developer Intern

[Redmind Tech](#)

Jun 2025

- Designed and built full-stack features using HTML, CSS, JavaScript, and PHP routing scripts.
- Configured database connections, structured SQL queries, and secure backend endpoints.

KEY PROJECTS

Sprintora AI Agile Workspace

React.js, Fastify, PostgreSQL, Llama-3.3

🔗 [github.com/vimalRaj45/vsgrps_agile_frontend](#)

- Built an AI-driven multi-tenant agile planner that automatically breaks down system requirements into tasks and estimates hours via Llama-3.3 (Groq API).
- Designed a fluid Kanban interface and implemented secure PostgreSQL database isolation.

CRM System for Lead Generation

Node.js, Groq API, Mistral, Playwright

[github.com/vimalRaj45/crm-finalv1](#)

- Engineered a 7-stage automated pipeline that ingests emails via IMAP, normalizes subjects, and uses Groq (Llama-3.1) to extract and structure R&D roles in JSON format.
- Ranks job URLs via Serper API, scrapes descriptions via Playwright with 7-day caching, and applies Mistral scoring logic before appending qualified leads to Google Sheets.

Sona College R&D Portal

React.js, Spring Boot, Java, MySQL

🔗 [github.com/naveenraj59/sona-rd-portal-backend](#)

- Designed a centralized research management system implementing granular role-based access control.
- Built robust CRUD REST APIs in Java Spring Boot to track publication approvals, submissions, and budgets.

THREADS '26 Event Portal

Node.js, Fastify, PostgreSQL, Upstash Redis, PDFKit

🔗 [github.com/vimalRaj45/threads26](#)

- Created a registration platform managing real-time booking counters backed by Upstash Redis.
- Implemented dynamic ticket generation using PDFKit alongside secure QR-code check-ins.

CO-CURRICULAR ACTIVITIES

- Smart India Hackathon (SIH) 2025:** Designed a Railway Document Management System for KMRCL, implementing secure document digitization, automated classification, and team coordination.
- Seed Money Project (Sona College):** Developed *Sona Doc Manager*, a document management platform built to upload, organize, index, and retrieve academic and administrative records.
